

Working together for sustainable development and global climate protection

One World.

One Climate.

FOUNDATION
Development
and Climate
Alliance

How it works:

Avoid and reduce greenhouse gas emissions and finance climate projects

If you as a company, institution or private individual wish to voluntarily offset your carbon footprint, the Development and Climate Alliance will help you offset unavoidable emissions via certified climate protection projects, offering guidance in selecting beneficial projects.

Our partners will advise you on the choice of specific and appropriate projects and support you in developing a robust climate strategy. Alternatively, you may wish to work together to develop your own individual climate protection projects that will have an impact on sustainable development.

You will acquire quality-controlled carbon certificates up to the amount of your desired offsetting goal. These certificates meet high international standards.

The certificates acquired not only reduce the global carbon footprint but also support the United Nations Sustainable Development Goals (SDGs) and help to improve the living conditions of people in countries of the Global South.

Financing climate projects via the acquisition of carbon certificates is therefore a worthwhile and, above all, effective way of promoting sustainable development and climate protection in addition to your own avoidance and reduction of greenhouse gas emissions.

Good for the future on three levels

1. **We create sustainable prospects for developing and emerging countries.**

This includes forest protection, alternative energy production, energy efficiency, equipping households with low-emission ovens, etc. By supporting a variety of projects, we improve many people's environmental, living and working conditions, enabling them to develop sustainable ways of working and economising.

2. **We protect the global climate with the aid of financing climate projects.**

The projects the supporters of our Alliance are involved in have a measurable positive impact on the climate: acquiring carbon certificates reduces greenhouse gas emissions or removes them again from the atmosphere by what is referred to as "carbon sinks". This improves the global greenhouse gas emissions footprint, making an important contribution to facing up the climate crisis.

3. Climate protection and sustainable development – always interconnected.

By improving the standard of living in countries of the Global South, we promote economic and social stability and consolidate international partnerships that also have a positive impact on our own life prospects.

State-led efforts alone are not enough

We must all get involved; because only by working together now can we secure, for ourselves and the generations to come, a future that is worth living.

You too can start taking responsibility: become a supporter of the Development and Climate Alliance!

In 2015, the 2030 Agenda for Sustainable Development was adopted by the Member States of the United Nations. As an Alliance, we promote the implementation of this global sustainability agenda and work towards the goals of the Paris Climate Agreement. In doing so, we contribute to development and climate protection. Our aim is global sustainable development: we actively take on the impending climate protection challenges.

Our projects support the 17 Sustainable Development Goals set by the 2030 Agenda.

1 NO POVERTY 	2 ZERO HUNGER 	3 GOOD HEALTH AND WELL-BEING 	4 QUALITY EDUCATION 
5 GENDER EQUALITY 	6 CLEAN WATER AND SANITATION 	7 AFFORDABLE AND CLEAN ENERGY 	8 DECENT WORK AND ECONOMIC GROWTH 
9 INDUSTRY, INNOVATION AND INFRASTRUCTURE 	10 REDUCED INEQUALITIES 	11 SUSTAINABLE CITIES AND COMMUNITIES 	12 RESPONSIBLE CONSUMPTION AND PRODUCTION 
13 CLIMATE ACTION 	14 LIFE BELOW WATER 	15 LIFE ON LAND 	16 PEACE, JUSTICE AND STRONG INSTITUTIONS 
17 PARTNERSHIPS FOR THE GOALS 	SUSTAINABLE DEVELOPMENT GOALS 		

Become part of the solution

The Development and Climate Alliance has achieved a lot since its founding. We already have around 1,500 supporters:

companies, associations, nonprofit organizations, scientific and public institutions, cities and municipalities, state ministries, partners for development and climate and private individuals are committed to supporting projects in developing and emerging countries. Together, we create sustainable prospects for people in the Global South and thereby secure our common future.
