

Working together for sustainable development and global climate protection

One World.

One Climate.

**FOUNDATION
Development
and Climate
Alliance**

How it works:

Avoid and reduce greenhouse gas emissions and finance climate projects

As a government-funded multi-stakeholder platform, our main goal is to foster sustainable development and climate protection through private actor engagement. We do so by assisting organizations and individuals who wish to account for and reduce their carbon footprint, e.g. by developing robust strategies. We also provide them with the opportunity to fund climate projects with additional development value to account for non-avoidable residual emissions.

In acquiring high-quality carbon certificates, you take action towards balancing your carbon footprint while ensuring a development impact, strengthening vulnerable communities and working towards the Sustainable Development Goals (SDGs). Our highest priority in this regard is both the permanence and measurability of these climate projects. Therefore, we put great emphasis on promoting high-quality, science-based standards regarding these carbon certificates.

In addition, we provide you with various forms of information regarding e.g. sustainability reporting and communication through workshops or research papers.

Sustainability impact on three levels

1. **We create sustainable solutions for developing and emerging countries.**

This includes forest protection, alternative energy production, energy efficiency, equipping households with low-emission ovens, etc. By supporting a variety of projects, we create a lasting improvement in living conditions for vulnerable communities and support the transition of economies.

2. **We achieve a lasting impact against climate change by financing climate projects.**

The projects financed by the supporters of our Alliance have a measurable positive impact on the climate: acquiring carbon certificates reduces greenhouse gas emissions or removes them from the atmosphere by what is referred to as “carbon sinks”. This improves the global greenhouse gas emissions footprint, making an important contribution in facing up to the climate crisis.

3. Climate protection and sustainable development – always interconnected.

By improving the standard of living in countries of the Global South, we promote economic and social stability and consolidate international partnerships that also address the vital question of climate justice.

State-led efforts alone are not enough

The public sector can only provide a fraction of the overall financial volume that is needed for the successful transition of economies.

Therefore, the private sector's financial and innovative potential is crucial to achieving the SDGs.

You too can start taking responsibility: become a supporter of the Development and Climate Alliance!

In 2015, the 2030 Agenda for Sustainable Development was adopted by the member states of the United Nations. As an Alliance, we promote this global sustainability agenda and work towards the goals of the Paris Climate Agreement. In doing so, we contribute to development and climate protection. Our aim is global sustainable development: we actively take on impending climate protection challenges.

Our projects support the 17 Sustainable Development Goals set by the 2030 Agenda.

1 NO POVERTY 	2 ZERO HUNGER 	3 GOOD HEALTH AND WELL-BEING 	4 QUALITY EDUCATION 
5 GENDER EQUALITY 	6 CLEAN WATER AND SANITATION 	7 AFFORDABLE AND CLEAN ENERGY 	8 DECENT WORK AND ECONOMIC GROWTH 
9 INDUSTRY, INNOVATION AND INFRASTRUCTURE 	10 REDUCED INEQUALITIES 	11 SUSTAINABLE CITIES AND COMMUNITIES 	12 RESPONSIBLE CONSUMPTION AND PRODUCTION 
13 CLIMATE ACTION 	14 LIFE BELOW WATER 	15 LIFE ON LAND 	16 PEACE, JUSTICE AND STRONG INSTITUTIONS 
17 PARTNERSHIPS FOR THE GOALS 	SUSTAINABLE DEVELOPMENT GOALS 		

Become part of the solution

The Development and Climate Alliance has achieved a lot since its founding in 2020. We already have more than 1,500 supporters.

Companies, associations, nonprofit organizations, scientific and public institutions, cities and municipalities, state ministries, partners for development and climate and private individuals are committed to supporting projects in developing and emerging countries. Together, we tackle inequalities and have a positive impact on both the livelihoods of vulnerable communities in the Global South and the course of climate change.
